Major Parts of the Respiratory System

- **Nasal Cavity and Sinuses:** Air enters and is warmed or moistened.
- **Trachea and Bronchi:** Airways that direct air into the lungs.
- **Lungs:** Main organs where oxygen is absorbed and carbon dioxide is released.

The Magic School Bus takes readers inside the lungs, showing how alveoli (tiny air sacs) absorb oxygen into the blood and how breathing muscles work to expand and contract the lungs.

The Digestive System: Turning Food into Energy

The digestive system breaks down food, absorbs nutrients, and eliminates waste.

Key Organs and Their Functions

- **Mouth:** The starting point of digestion, where food is chewed and mixed with saliva.
