Definition of Root Words

Root words are the most basic form of a word that carries the core meaning without any prefixes or suffixes. They serve as the foundation upon which other words are built through various affixes. For example:

- The root word "act" forms words like "action," "actor," "react," and "enact."
- The root "ject" appears in "eject," "project," "inject," and "reject."

Characteristics of Root Words

- They often originate from Latin or Greek.
- They carry the primary meaning that is expanded or modified by affixes.
- They can stand alone as words (e.g., "run," "blue") or serve as roots for more complex words.
- They are integral to understanding morphological relationships within the language.

The Role of Roots in Word Formation

Affixes and Their Relationship with Root Words

Words are often formed by adding prefixes or suffixes to root words. These affixes modify the meaning or grammatical function of the root. For example:

- Prefixes like "un-" in "unhappy" change the meaning to the opposite.
- Suffixes like "-ness" in "happiness" turn adjectives into nouns.
