- **Fixed Costs:** Costs that remain constant regardless of production volume (e.g., rent, salaries).
- **Variable Costs:** Costs that vary directly with production levels (e.g., raw materials, direct labor).
- **Semi-Variable Costs:** Costs that have both fixed and variable components (e.g., electricity charges).
- **Direct Costs:** Costs directly attributable to a specific product or department.

Absorption Costing

All manufacturing costs, both fixed and variable, are absorbed into the cost of production. It aligns with financial accounting requirements and is useful for inventory valuation.

Throughput Costing

Cost Accounting Systems and Procedures

Implementing an effective cost accounting system requires proper procedures and organizational structure.

Cost Recording and Documentation

Accurate recording of costs through source documents like job sheets, timesheets, and purchase

orders ensures data integrity.

Cost Ledger and Cost Sheets

Maintaining detailed ledgers and cost sheets helps in tracking costs associated with different departments or products.

Budgeting and Variance Analysis

Budgeting involves planning future costs and revenues, while variance analysis compares actual results with budgets to control operations.
