- Prioritize Critical Areas: Focus on functionalities most essential to the business.
- Provide Instructions: Clarify how to fill out the questionnaire and what details are needed.
- Include Rating Scales: Use Likert scales (e.g., 1 to 5) for subjective assessments like usability or aesthetics.
- Encourage Specific Feedback: Ask testers to specify pages, features, or scenarios related to issues.
- Test the Questionnaire: Run a pilot test with a small group to refine questions and flow.
